GitHub: github.com/PeiqinGuan
LinkedIn: linkedin.com/in/peiqin-guan-754b551b9

Self-taught frontend developer passionate about learning latest technologies and creating sleek and user-friendly applications.

Skills

Technical: React, JavaScript, HTML, CSS / SASS / Bootstrap / Tailwind CSS / Material UI, Git

Non-Technical: German / English / Chinese, market research, client communication

Personal Projects

Personal Portfolio Website

- Built the whole portfolio website from scratch with modern design and animation on scroll using [React](#).

YouTube Clone

<https://github.com/PeiqinGuan/youtube-clone>

- Built a fully functional responsive YouTube clone using [React](#) and [Material UI](#), fetched data from YouTube API. User gets video feeds by categories and can search videos using built-in search function.
- Implemented core components including video feeds, search result feeds, video watching site and channel detail site, the video feeds support infinite scrolling.

Budgeting App

<https://github.com/PeiqinGuan/react-budget-app>

- Built a responsive CRUD app for budgeting and expense tracking using [React](#) and [Bootstrap](#). User can create different budgets and track expenses accordingly, the data will be stored using local storage.
- Implemented various React concepts such as useContext, useRef and custom hooks.

Flashcard Quiz Generator

<https://github.com/PeiqinGuan/react-quiz-app>

- Built a responsive flashcard random quiz generator using [React](#) and [Bootstrap](#), fetched data from [API](#). User can generate arbitrary amount of quiz from different categories each time, showed in flappable flashcards.

Education

freeCodeCamp (Online learning platform)

Dec 2022 - Present

- Certifications: Frontend Development Libraries, JavaScript Algorithm and Data Structures, Responsive Web Design (add up to 500 learning hours)
